

Science Vision at Havelock

Our vision is that children at Havelock will develop a secure understanding of the **world** around them through a high-quality curriculum in which **disciplinary knowledge** is embedded within the **substantive content**. Children will learn and discover through engaging in practical **investigations** and challenging opportunities, which will encourage them to **work scientifically**. Through developing a sense of excitement and curiosity we hope to create young scientists who are **inquisitive, highly motivated** and **reflective**. We aspire to ensure pupils understand the current **implications** of science in their lives and for the future.
